Milk makes exceptionally smooth vodka with a unique creamy character. The milk is separated into curds and whey. The curds are used to make cheese; the whey is fermented into a beer using a special yeast that converts the milk sugar into alcohol. This milk beer is then distilled and treated to our secret blending process. The vodka is then triple filtered and finished, before being hand bottled.

### Aval Dor Cornish Vodka

In 1904 Stafford Matthew Dustow fulfilled his lifelong ambition and bought a quaint little farm nestled in the heart of Cornwall. Over 100 years have passed and now Stafford's great, great grandsons are transforming their finest King Edward potatoes into a premium vodka spirit. Distilled in a tiny copper batch still then blended with mineral water from an aquifer deep beneath the farm, Aval Dor is a voluptuous and viscous vodka that can be enjoyed neat over cracked ice or as part of your favourite cocktail.

### Chase Marmalade Vodka

Beginning life as the 'World's Best' Chase Vodka, the smooth and creamy spirit is marinated with a bespoke Seville orange fine marmalade in the Chase alembic copper pot still; Ginny. The resultant spirit is then further distilled in the world's tallest rectification column (standing at 70ft) with the vapours passing through fresh Valencian and Sevillian orange peel, creating a beautifully bittersweet and 100% natural orange experience.

### Sipsmith Sipping Vodka

An unadulterated, unfiltered vodka for sipping. A testament to how we handcraft all our award-winning spirits.
